DEAN PARK HOTEL KIRKALDY

PROJECT OVERVIEW

When a hotel's owners list construction and design amongst their passions, you know that when sourcing locking systems, they will be keen to ensure both high-quality engineering and superb styling. At the Dean Park Hotel in Kirkaldy, the upgrade has seen their old Amadeo locks replaced by a total of 50 dormakaba Confidant digital locks, all in a smart black/chrome finish.

We're proud to have contributed to the change, supporting the system installer, providing training and commissioning the installation. The result is everything the proprietors wanted: great aesthetics, robust security, quality build and trouble-free operation.
