

ACCESS2 | CASE STUDY

GRAND LISBOA PALACE RESORT MACAU

PROJECT OVERVIEW

This development, which is due to open mid-to-late 2021, comprises three luxury hotels with around 2,000 rooms and includes 27,000 square metres of gaming facilities, 34,000 square metres of retail shops and 36,000 square metres of restaurants and entertainment areas.

The complex leisure development not only demanded several unique high end special finishes, but a cylinder system that could deliver multi-profile Patented Key Security.

Access2 Tigris Premier3 cylinders were able to accommodate these challenging requirements with ease.

“As the specified Architectural Ironmonger for the prestigious Grand Lisboa Palace Resort Macau, we needed a cylinder supplier who could offer a high security product in multiple special finishes along with excellent service. It was also important to us that the supplier had experience with large, complex projects. We have been delighted with Access2. Their competence and understanding of what was needed, along with their service, have helped us to achieve our goals for the project.”

Kilkenny Chan, Key Technologies International Limited, Hong Kong.
